

## SCHOOLS EYES SCREENING REPORTS for TURKANA COUNTY

### SCHOOLS EYES SCREENING REPORTS for TURKANA COUNTY

Turkana County is a county in the former Rift Valley Province of Kenya. Turkana is the second largest (after Marsabit County) and also the north-western most county in Kenya. It is bordered by the countries of Uganda to the west; South Sudan and Ethiopia, including the disputed Ilemi Triangle, to the north and northeast; and Lake Turkana to the east. ...

Its has a Total Population of 855,399 ;  
123,129 House holds and covers an ...

#### Climate and Weather

Turkana is **one of the driest** counties of Kenya. It experiences very high temperatures during the day and moderate temperatures during the night all year round. The temperatures are estimated to be 25-35°C.

The county receives between 150mm and 400mm of rainfall annually, with average precipitation being 250mm. The rainfall pattern is unpredictable and at times Turkana receives no rain in a whole year. As a result, the residents of Turkana County are faced with a persistent threat of starvation.

#### Health Facilities

Turkana County has three district hospitals; Lodwar District Hospital, Katilu District Hospital and Lokitaung District. The county has over 100 health centres serving the health needs of the residents.

INDICATOR	County 2012	County (Current)1	Kenya (Current)1

### **Campaign Against Blindness**

Trachoma is one of the major causes of blindness in Turkana. Trachoma is highly associated with dirt and flies. Trachoma strikes when a bacterium called *chlamydia trachomatis* scars the membrane inside the eyelids, making the lashes turn inwards and rub the eye ball, causing a painful, blinding injury.

Cultural beliefs about flies and riches were another factor which made the campaign against trachoma difficult, he said. The more flies one attracted, the more wealth one accumulated, was a myth that was widely believed.

The Ministry of Health has been conducting trachoma prevention exercise in Turkana county but the effort is not enough given the geographical diversity of Turkana targeting both children and adults. 0-6 months old children are being vaccinated with tetracycline eye ointment, while those between seven months and five years will be given Azithromicin syrup. "Children above five years and adults are usually given 250 Mg tablets depending on their age and height.

In Turkana, patients may need to walk between 20 and 30 kilometres to health clinics. When they reach these clinics, there's often a scarcity of medical equipment and drugs. Sometimes patients are treated by a nurse aide who doesn't have specific eye care knowledge. This has fueled the high prevalence of blindness in Kenya.

It's against this backdrop that KSB in partnership with Jubilee Insurance Company Limited came up with a school screening exercise in 10 counties in 30 schools three of which were from Turkana County in last quarter on 2017.

## Education

As of 2013, there are 202 primary schools and 19 high schools in Turkana County, serving 122,883 pupils and 40,004 students respectively. The county's Teacher to Pupil Ratio is 1: 51 for public primary schools and 1:28 for public high schools.

Some of the top high schools in Turkana include Turkana Girls Secondary School, Lodwar Boys High School, Kakuma Secondary School, Katilu Secondary School and RCEA Lokori Boys Secondary School.

Institutions of higher education in the county include Mt Kenya University (Lodwar Campus), Kenya Medical Training College (KMTC-Lodwar), Elix Centre of Informatics (Lokichar) and Lodwar Youth Polytechnic.

### Below Find the Reports per school of the screening Exercise
