HumanWare is a Global Leader

Founded in 1988, HumanWare has been a global leader of innovative solutions for people with vision loss for 30 years

HumanWare today is #1 worldwide
Especially in products and services for students who are blind or low vision

HumanWare is part of the EssilorLuxottica Group
The leader in ophthalmic lenses with revenues over 7B$

HumanWare can count on 150 highly skilled employees serving independence
(15% of our employees are also our clients)
Recognised for our innovation
We integrate cutting edge mainstream technologies into specialised devices to empower autonomy for people with vision loss

We invest over 10% of our revenues in R&D
With a team of over 40 engineers and computer specialists and working with technology partners in Canada, USA, India, China and Bulgaria

We have the most advanced products for the visually impaired in the world
With more than 500,000 users in more than 45 countries

Our products support over 20 languages
A full range of products for education
Including Notetakers, Braille displays, digital talking book players, orientation devices, intelligent low vision solutions, etc.

More than 50% of our sales are in education
A large part of our sales in the USA, UK, Canada, Europe and Australia are in the education sector

Developing new technologies for the classroom
Working on STEM (Science, Technology, engineering and mathematic) solutions with a group of partners

Offering a wide range of services to schools and specialised teachers
Resources Guides, Webinars, training, workshops, equipment loans, etc.
Humanware with Kenya society for the Blind

- Big thanks for the warm amazing welcome both Lucky and I have had in Kenya.
- No one organisation can address the need of technology for Blind people in Africa - we need to work with partners.
- Our aim with our partners is to initiate the following in Kenya and Africa:

  “awareness of Technology and the difference it can make to independence and braille literacy for blind & vi people”

  “Install training and support to ensure a sustainable future for technology for all people with a visual impairment in Africa”

  “do our best to lobby/ advocate for change in technology within education that will give visually impaired youth inclusion, independence and better opportunity's for the future”
